From the first name in coffee brewing comes the first coffee grinders of the 21st century! The Digital InterLock Series from Curtis, with ADS™ (Advanced Digital System) technology. These coffee grinders enable users to link grinder to brewer for the perfect brew, every time.

Specially designed and styled for use with Gemini® and ThermoPro™ Series brewers with 3-Batch option, these advanced grinders interlock for complimentary systems, making fresh grind/fresh brew programs a snap. And Dual Hopper capacity gives you the flexibility to fresh grind from two separate selections, making your specialty or decaf coffee as fresh as your house blend.

**Advanced Digital System™ – A Curtis Exclusive**

ADS™ represents the future of coffee equipment technology, giving operators unparalleled control, consistency, quality and ease of use.

**ADS™ Features:**

- **Digital Superiority** – Electronic solid state technology centralizes controls on the front Touchkey Panel for easy programming and precise performance.

- **Touchkey Control Panels** – Provides up to 10 times longer working life than mechanical switches and a smooth surface for easier cleaning and maintenance.

- **Fully Programmable Grind Cycle** – Digital LED readout shows grind cycle length clearly. Set grind cycle from 1 to 99 seconds.

- **Self-Diagnostic** – ADS™ technology expedites service.

- **One Touch Grind-to-Brew** – When combined with the GEMGT or ThermoPro™, digital controls automatically select brewing cycle to correspond with selected grind quantity for error-proof brewing every time.

---

**The Easiest Interface Ever**

*Digital Controls*

- **LED Display** — Indicates grind cycle length for absolute accuracy of grind. Dial-in perfect grind length, eliminate guessing.

- **Grind Select Buttons** — Select from small, medium, large and the InterLockE system automatically locks in grind time on the brewer (3-batch only option). Each button is fully programmable to your specifications.

- **Grind Select Indicator Lights** — Lets you know clearly which cycle length is currently grinding.

- **On/Off Switch**

---

*TIME 10 SECONDS*
**Factory-set grind cycles can be easily changed.**
Grind time for each cycle is accurately displayed by the readout. To change, simply follow these steps (each button is set independently):

- Turn the grinder off. Place a brew cone and filter in the machine.
- Press and hold the grind cycle button. At the same time press and release the ON/OFF button.
- Now press the grind cycle button again. The display will indicate its current setting. Immediately following it will begin grinding. The display will indicate the elapsed time from zero.
- When the desired level is reached, release the button.*
- Wait until the motor has stopped completely, and press any OTHER button on the same side. This sets the time and exits the programming mode.

*Add time by pressing and holding the flashing button until the desired level is reached.

**Digital InterLock™ System — Only from Curtis.**
**Automatic Grinder-to-Brewer Interface**
Designed for fresh grind/fresh brew programs, the Curtis Digital InterLock™ System connects compatible Digital Control Coffee Brewers to Digital Control Grinder for simple, error-proof grinding and brewing.

With the push of a button, the Grinder automatically conveys the selected grind volume to the brewing system. The brew selection is then “locked-in” to the corresponding grind cycle...incorrect cycles are “locked out.” If both brewer sides are in use, the Grinder’s memory stores the information and waits until a side is available.

**Standard Features**
- **Dual-Hoppers** - Include decaf or a specialty coffee in your fresh grind/fresh brew program.
- **Infinitely Adjustable Grind Settings** - From extra coarse to extra-fine grinding.
- **Larger Hopper Capacity than Competitive Models** - Reduces labor costs with less frequent refills.
- **Positive Flow Auger** - For uninterrupted coffee dispensing.
- **Self-Adjusting Brew Rails** - Easily handle large Gemini brew baskets.
- **Wide Match Profile** - Brew rails never extend beyond housing with larger baskets.
- **Large Grinding Burrs** - Provide faster more efficient operation.
- **Accurate and Consistent Throw** - For even distribution, chaff reduction.
- **Uniform Grind.**
- **Powerful 1/2 hp Motor** - Equipped with safety circuit breaker.
- **Standard 120VAC Operation.**
